Auto-enrollment upon course completion

Ester Andersson - 2024-10-27 - [Functions](#)

Auto-enrollment upon course completion is a function that lets the system automatically enroll a learner in a new course when another course is completed.

1. Go to the course you want your learners to complete to be enrolled in another.
2. Under "Next course", click "Add next course". Choose the course your learners should be enrolled in.
3. Create an automated communication in the next course to let the system automatically send a welcome email to all registered participants (not mandatory).
4. Your learners now have access to the course!

The screenshot shows the Learnifier interface for a course titled "Introduction to Learnifier". The course is currently "Ongoing" and has 9 participants. The interface includes a navigation bar with options like Dashboard, Projects, Users, Library, Reports, Automations, and Settings. Below the course title, there are tabs for Overview, Participants, Waitlist, Course Page, Events, Assignments, Details, Communications, Reports, and Settings. The main content area is divided into several sections: a course overview with creation and update dates, a participants summary with a progress chart (5 Not Started, 3 In Progress, 1 Completed, 9 On Track, 0 Overdue), an Awards section with an "Attach" button, a Next Course section with an "Add Next Course" button (highlighted by a green arrow), a Project Team section with an "Add Team Member" button, and a Discussions section with a "Share your thoughts" input field and a "Post" button. There is also an Announcements section at the bottom right.
