New feature: Checkpoint Questions

2025-09-22 - Gabriella Eriksson - [Product Highlight](#)

Activate learning with Checkpoint Questions

When participants stay active, engagement increases, and stronger memory traces are created. The result: more participants complete their training, and your investment in learning delivers real impact across the organization.

With our new content type, **Checkpoint Questions**, you can add small question blocks directly inside the activity in your Learnifier course. Each block can contain up to 10 questions in various formats, including single-select, multi-select, and true/false. Participants receive instant feedback on right and wrong answers, can compare their responses with others, and see clear progress along the way.

By reflecting, making decisions, and receiving immediate feedback, participants learn more deeply. They stay motivated, which strengthens both course completion rates and long-term learning outcomes.

Give your participants a meaningful learning experience → try the new feature today!

Availability: All plans

The screenshot displays the Learnifier user interface. On the left is a sidebar menu with a 'Course content' header and a list of course sections: 'Welcome!', 'Make Learning an Experience' (highlighted with a blue circle), 'Emotions & Learning', 'Take them on a Learning Journey', 'Scenario-Based Learning', 'Checkpoint' (highlighted with a green checkmark), 'Create a Learning Journey with the Help of AI', '"Walk & Learn"', 'Your text, as a podcast', and 'Thank you!'. The main content area is titled 'Make Learning an Experience' and 'Checkpoint' (with a green checkmark and 'Completed' status). Below this is a progress bar and 'Question 1 of 3'. The question text is 'Without repetition we only remember 20% of what we learned.' followed by 'Select 1 correct answer'. The question is accompanied by a photo of a man in a white shirt and glasses, resting his chin on his hand. Below the photo are two radio button options: 'True' (selected, with a green checkmark) and 'False' (unselected, with a red cross). Below the options, a green message states 'You answered correctly.' and a blue button labeled 'Next question' is visible. A green checkmark and 'Completed' status are shown at the bottom right of the question block.
