How do I make the corners of an image rounded?

Ester Andersson - 2024-02-16 - Tips & Tricks

If you wish to add rounded corners to an image in Learnifier (either in an activity or in an email template), you must first add the image as a URL.

1. Add a new text component and click on the image icon in the grey menu.

1. In the style tag, add the following:

border-radius: 25px !important;"

The final code should look like this:

```
<img alt="" img="" src="{image url} " style="width: 100%; height:
100%x; border-radius: 25px !important;" />
```

1. All done!
