New design and smoother experience on the Project Page

2025-04-24 - Gabriella Eriksson - Release notes

We've launched a new design and improved experience on the Project page!

The new layout is designed to streamline the way you work with your projects, with faster navigation, better overview, and a clearer structure. The result? A smoother workflow and greater opportunities to drive learning that creates value for your organisation.

What's New?

- **New layout and navigation**
  The menu has been moved to the left side for a cleaner overview and easier access to different parts of the project. This also allows for a more efficient use of space, improving both clarity and navigation.

- **Project and course naming have been separated and relocated.**
  The project name (visible to admins) and the course name (visible to participants) are now managed independently. Simply click the name field to edit either one.

- **Clearer publishing flow**
  A new **"Publish Course"** button has been added to the far right, making it easy to spot when you're ready to go live!

- **Buttons repositioned**
  Actions like **editing** and **previewing** the course are now located on the right-hand side, exactly where you'd expect them.
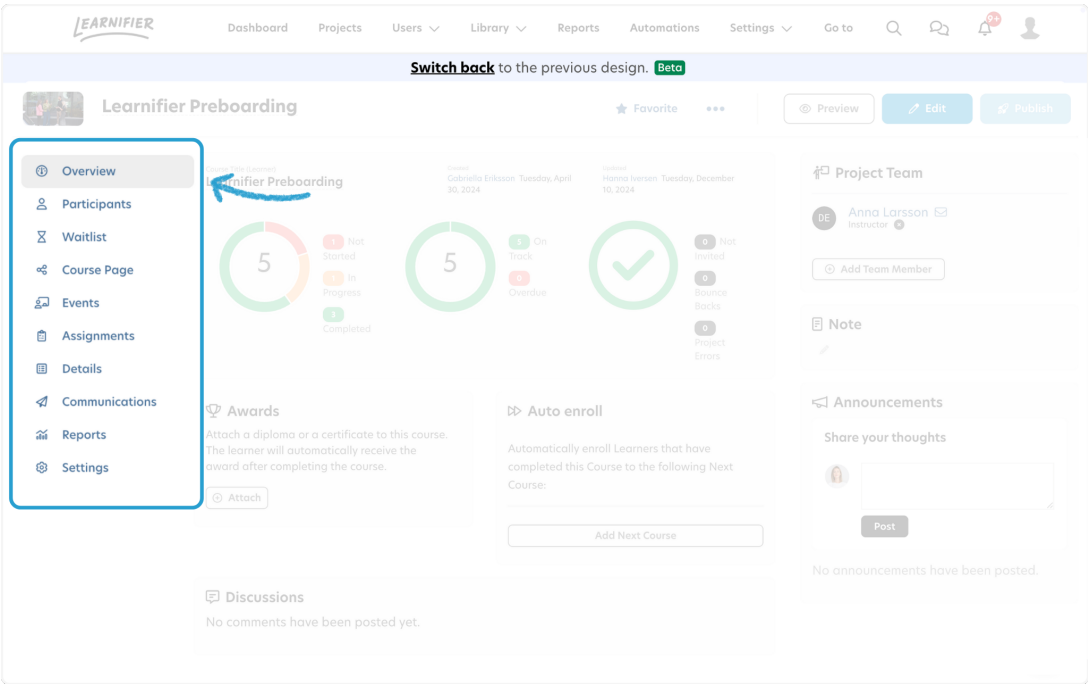

- **Cleaner project management**
  Options such as **Create Template**, **Duplicate**, and **Delete** have been relocated to the overflow menu (⋯) for a cleaner, more streamlined interface.
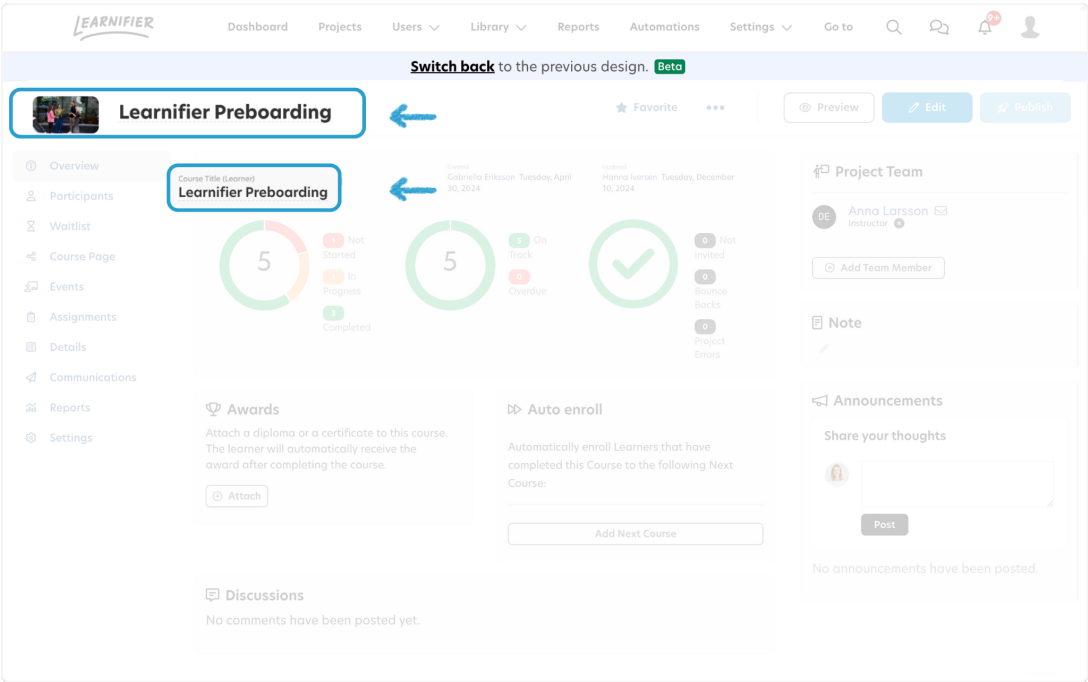

The new project page is available in beta

You can easily switch between the old and new design using the toggle at the top. Try it out, and don't hesitate to share your feedback with us!
